PRESCRIPTION READING LENSES

ADD ONS -

READERS - SINGLE VISION LENSES

Prescription reading glasses come in the form of your magnified prescription to improve vision for reading and viewing closeup objects. Reading glasses also help correct a condition called presbyopia. This condition occurs when the eye's own lenses lose their flexibility the natural degradation of one's vision due to ageing. Designed to view at close range of 30cm to 40cm distance.

Email to info@twinshields.com.au or text a photo of your prescriptions to 0412 704 313. Let us know if you want any extras such as anti-reflection coating or Transition added to quote. If we have any queries, we'll contact you to clarify.

Before you send your Frame, We'll send you a quote.

When you give us your frame to go ahead and made payment, we'll organise to make glasses ASAP.

You can expect delivery within two weeks. We'll also need your mobile number and a delivery address.

Send Frame to: **TwinShields**
PO BOX 571, Castle Hill, NSW 1765
